

## TRIZ worldwide survey

Friday, 17 April 2009

As TRIZ is now widely spread throughout the world, it has undoubtedly randomly evolved throughout people and organization perceptions and uses.

Under ETRIA's organization and most of its worldwide spread members, a survey has been launched, touching both academical, industrial and consulting institutions.

The idea is to capture an image as reliable as possible of the worldwide perceptions of TRIZ and ongoing directions based on reported facts by worldwide key persons.

According to this objective the proposed survey consists in five chapters and a total of 70 questions organized as a system (depending on the answers a different set of questions is proposed).

The survey is made sufficiently short in order for people not to spend more than 20 min to fill it (if data's are available to them).

All ETRIA Country Representatives are kindly invited to contribute to this initiative.

Please contact Denis Cavallucci [denis.cavallucci \(at\) insa-strasbourg.fr](mailto:denis.cavallucci@insa-strasbourg.fr) for further details and to participate to the survey.
